Welcome to the Field of Your Dreams

Customize your home field advantage with a personalized field package exclusively from Goal Sporting Goods.

There has never been an opportunity to build a custom field with team pride and distinct home field advantage until now. Our customizable personalization product line includes everything you need to build an entire field based on your team colors.

Start with the goals . . .

We can color our official goals to match your team colors. These goals exceed NCAA, NHSAA, and FIFA specifications, and are available in 4" round or square aluminum. Our new high-end aluminum 4" x 5" official elliptical goal is also available for customization. See charts on back page for color selections.

Add Nets . . .

We have a wide selection of nets available in orange, yellow, red, white, and blue.

Line the field with custom colors . . .

Where is it written that fields have to be lined in white? Our field marking paint is available in nine colors: black, white, orange, yellow, red, dark blue, light blue, green and maroon. Our grass-and-turf-friendly paint provides non-clogging, weather resistant coverage that is second to none.

reams

CUSTOMIZED, PERSONALIZED...MAKE IT YOURS!

Personalize your corner flags with custom printing . . .

Corner markers can be printed with your school or club name, logo, or sponsor. Flags measure 60"H x 1/2" OD. The flexible acetate plastic post will not break or shatter. Posts attach to a strong spring base with a fully galvanized, powder coated steel spike. Flags measure 13" x13". Our most popular corner flags– SCM1, SCM3, and SCM4– can be custom printed.

Add custom colored bleachers for your fans . . .

Bleacher seats and footrests can be coated in one of your team colors, or seats can be one of your colors, and footrests the other. Bleachers have 10" wide aluminum seats with a non-skid surface and are available in 3, 4, and 5-row models. All aluminum planks are furnished with smooth finish end caps which install easily with self-tapping screws. Framework understructure is heavy-duty galvanized steel with front and rear crossbraces to stabilize frame. Understructures are robotically welded and hot-dipped galvanized. See chart on back page for color selection.

Personalize your team benches . . .

Bench seats and backrests, similar to the bleachers, can be coated one or two colors. Our benches are lightweight and maintenance free. All aluminum planks are furnished with smooth finish end caps. Framework is heavy-duty 1 5/8" OD galvanized steel, and seats are 10" wide with a non-skid surface. Benches come in 7.5' and 15' lengths. See chart on back page for color selection.

And finish with personalization

Personalize your goals, bench backs and bleachers with your team name, logo, accomplishments (ie. State Champs) and/or sponsor.
